

## Clinical Criteria Updates for Specialty Pharmacy

Effective March 1, 2019

On December 1, 2018, UniCare introduced new clinical criteria for injectable, infused or implanted drugs.

Effective for dates of service on and after March 1, 2019, the following new clinical criteria will be included in our clinical criteria review process. The drugs that require prior authorization will continue to require prior authorization notification with AIM.

Existing precertification requirements have not changed for the specific clinical criteria below. While there are no material changes, the document number and online location has changed. The table below will assist you in identifying the new document number for the clinical criteria that corresponds with the previous clinical guideline/medical policy.
